

PROFESSIONAL DYNAMIC MICROPHONE

BP-PA-DMIC01

DESCRIPTION

The BP-PA-DMIC01 is a shaking-proof conference microphone with switches (including built-in switches) and instructions. It can be assembled or disassembled easily. It's designed to sit on a desk. Its base is made from integral die-cast metal, delicate and small-sized.

FEATURES

- With full anti-interference
- Anti - electromagnetic interference and anti-mobile phone interference help the microphone avoid whistling or noise from the microphone.
- With switch impact eliminated

Some special technology is applied for eliminating noise when switching on/off the microphone. And it also avoids damage to the microphone.

- With good frequency, high-fidelity

Applying a special high-quality heart-shaped and ultra-pointing to the microphone core, coupled with a reasonable electro-acoustic circuit to make frequency response broader and flatter, producing high fidelity, clear and charming voice.

TECHNICAL SPECIFICATION

Model: BP-PA-DMIC01	
Capsule Type	Dynamic
Frequency response	50Hz-16KHz
Sensitivity	-73dB \pm 3 dB
Output impedance (ohms)	600 Ω \pm 30 % at 1 K Hz
Polar Pattern	Cardioid
Micro tube length	455mm
Base size (W * D * H)	115 * 138 * 40 mm
Anti-interference	Anti-mobile phone, anti-electromagnetic
Net weight	1.1kg
Gross weight	1.9kg
Packing size	450 x 175 x 75mm
