# CARD PARKING SYSTEM (CARD DISPENSER + CARD READER)

**For Temporary Cars:**

1.Visitors push the button to get a card from the entry card dispenser machine then the barrier gate will open automatically.

2.When the car pass through, the barrier gate will close automatically.

3. When the visitors leave, they need pay the parking fee at management center. Or pay at parking payment machine. (Read the cards then calculate the parking fee).

4. After payment, the center staff open barrier gate for visitors to leave. (If pay at payment machine, visitors just put the card back to the exit machine with card receiver, then the barrier gate will open automatically.)

5.Barrier gate close after the car pass automatically.

**For VIP Cars:**

They prepaid and got the registered cards then only need swipe the cards on the entry & exit machine and the barrier gate will open automatically.

# TICKET SYSTEM (TICKET DISPENSER + CARD READER)
