

PARTY SPEAKER – PB06AC

The PB06AC is a versatile party speaker with a maximum power output of 500 W. It features Bluetooth, USB and microSD playback, as well as an FM radio. A parametric equalizer (Pop, Classic, Rock, Jazz) and bass/treble adjustment allow you to customize the sound to your preferences. Thanks to the TWS function, two speakers can be paired for an even more powerful stereo effect. The built-in karaoke function with a wireless microphone included, along with additional 6.3 mm Jack inputs, ensures great fun. Colorful Disco LED lighting and a clear LED display emphasize the party character of the device. Mains power supply and a built-in rechargeable battery (up to 5 h of operation) guarantee full mobility and ease of use. A remote control further increases user comfort.
